1. Introduction

The syllabus for Botany at undergraduate level using the Choice Based Credit system has been framed in compliance with model syllabus given by UGC. While framing the syllabus as per the UGC guideline, the topics have been kept as generic as possible as per our own infrastructure, expertise and strength.

The main objective of framing this new syllabus is to give the students a holistic understanding of the subject giving substantial weightage to both the core content and techniques used in Botany.

Keeping in mind and in tune with the changing nature of the subject, adequate emphasis has been given on new techniques and understanding of the subject.

The syllabus has also been framed in such a way that the basic skills of subject are taught to the students, and everyone might not need to go for higher studies and the scope of securing a job after graduation will increase.

Considering the latest trends in the development of Plant Science and in compliance with the UGC model syllabus in Botany some new topics in the fields of Disciplines specific elective courses as well as Skill enhancement courses like Plant Biotechnology, Research Methodology, Industrial and Environmental Microbiology, Nursery and Gardening, Herbal Technology, Ethnobotany, Floriculture etc. have been included in the syllabus for the benefit of students from both theoretical and practical point of view.
